

Pro Forma Example - Purchase of One Specific, Separate Home

Home Acres, Houston - for a Home Buyer

This pro forma relates to the purchase of one specific home by one buyer. It does not describe a pooled investment, fund, shared ownership arrangement, or the purchase of an interest in a project. The company provides guidance, coordination, and process-management services only and does not hold or manage client funds.

Title endorsements	\$193	
Tax certificate	\$21	
Electronic recording	\$10	
Attorney document preparation	\$50	
Recording fees	\$81	
Total	\$3,440	

Important: These figures are estimates based on discussions with professionals and publicly available market sources. They are not certain and may change during underwriting, construction, and closing, including the home price, interest rate, rent, taxes, insurance, and other costs.

The metrics are calculated from delivery of the home and funding of the loan. They do not guarantee income, appreciation, or any particular outcome.

The first step is signing an option agreement to purchase a specific home. Later, subject to project progress and the binding agreements, the client exercises the option and completes the home purchase in a separate transaction.

Home Information

HOA: A neighborhood association payment for maintenance, enforcement, and appearance. The final amount is determined closer to completion.

Historical appreciation: A backward-looking figure from comparable Houston-area communities. It does not indicate or guarantee future appreciation.

Property tax: Texas property-tax rates vary by location and assessed value.

AI score: A supplemental review of neighborhood change, rental demand, schools, infrastructure, and accessibility. It is not a substitute for professional due diligence.

Financial Information

Equity: The amount expected to complete the transaction, including home payments, initial costs, and closing costs.

Additional liquidity / escrow: A lender may require prepaid property tax and insurance plus liquid reserves for several monthly payments.

Loan: The example assumes financing equal to 65% of the base price. Financing terms are determined through underwriting and may change.

Rate and loan structure: The final rate, points, prepayment terms, and loan duration are determined with the lender at the relevant time.

Projected Income and Expenses

Rent: An estimate based on comparable homes and market sources. Actual rent depends on the home, timing, and market conditions.

Insurance: The estimate may exclude optional or required additional coverage, such as flood insurance.

Leasing, vacancy, and maintenance: Statistical estimates only. Tenant turnover, vacancy periods, and unexpected costs may materially change the outcome.

Potential property income and possible value appreciation over time: These depend on market conditions and are not guaranteed. The five-year scenario is for illustration only.

Guidance and Coordination Fee - Aspect

The fee covers end-to-end guidance, coordination, and process management: reviewing alternatives, negotiations, coordinating entity and bank-account setup, coordinating professional advisors, due diligence, design, construction, inspection, delivery, and financing.

The service includes coordination with lenders, Realtors/Brokers, CPAs, attorneys, title companies, architects, contractors, and other professionals, as well as **obtaining the best transaction terms for clients**.

The company provides guidance, coordination, and process-management services only. It does not hold or manage client funds.

LLC, EIN, loan, customization, inspection, and closing costs are paid to the relevant providers and may vary from home to home and transaction to transaction.

Considerations and Sensitivity Scenarios

Purchase of a new home in a developing neighborhood

Key Home-Purchase Considerations

- Exchange-rate movements affect the shekel cost and the buyer's results.
- The neighborhood is in a developing area with new construction and renewal activity, but the pace of change is not guaranteed.
- The review indicates possible rental demand; actual vacancy and rent levels may differ.
- A new home may reduce some early maintenance uncertainty, but it does not eliminate unexpected expenses.
- Future refinancing may be possible, subject to the home's value, income, interest rates, and lender requirements at that time.
- The scenarios do not assume rent growth. Any positive or negative change affects potential property income.

9/10

Change and Value Potential
Developing location and new construction; appreciation is not assured.

8.5/10

Rental Demand
Access to employment centers and possible demand for new homes.

7.5/10

Market and Operating Risk
Sensitivity to interest rates, taxes, insurance, demand, and expenses.

9/10

New Construction
New systems and advance planning for long-term rental use.

Illustrative Five-Year Sensitivity - after estimated 7% selling costs

Annual appreciation assumption	Illustrative total profit	Calculated annualized ROI
0%	\$18,791	2.80%
2%	\$55,573	8.29%
4%	\$95,356	14.23%
6%	\$138,320	20.64%
8%	\$184,651	27.55%
10%	\$234,545	35.00%

These scenarios are not forecasts or guarantees. Small changes in rent, rates, expenses, delivery timing, or sale price may materially change the outcome.

Disclosure and Disclaimer

This pro forma is provided for information and illustration only. It does not constitute an offer, solicitation, investment advice, financial advice, legal advice, tax advice, a recommendation to purchase, or a commitment to complete any transaction.

All projections and estimates, including rental income, operating expenses, occupancy, appreciation, interest rates, financing, taxes, and financial metrics, are based on market data, third-party sources, historical trends, and assumptions as of the date of preparation. Purchasing and owning real estate involves risks, including market changes, interest-rate fluctuations, regulatory or tax changes, tenant and occupancy risks, unexpected expenses, maintenance, repairs, and delays. Actual results may differ materially.

Nothing in this document is an express or implied representation or commitment regarding the accuracy or completeness of the data or any future result. Each client and home buyer must conduct independent due diligence and consult their own legal, tax, and financial advisors before making a decision.
